

FLORA AND FAUNA

We want to create corridors around the Parish where wildlife can move freely between different habitats.

We need your help to achieve this. The Sussex Wildlife Trust has given us the opportunity to gather data using the iRecord App which we can use for our Plan and which will feed into the Sussex wide picture.

Could you help us by recording sightings of flora and fauna, such as bats, orchids, birds, bees etc.

HABITAT

We want to preserve important habitats. Do you know of places that are special for wildlife?

Do you know where any ancient trees are located?

Local Green Space

The Localism Bill gives communities the power to designate land that is 'demonstrably special' as Local Green Space. This can protect it from development.

What green spaces would you nominate?
